SKILLS

JavaScript, Python, HTML, CSS, Git, Docker, Heroku, Render, React, Redux, MUI, Node.js, Express.js, Flask, SQL, SQLAlchemy, SQLite3, PostgreSQL, Amazon Web Services(AWS)

PROJECTS

Spotify Clone | *(JavaScript, React/Redux, Python, Flask, SQLite3, SQLAlchemy, JSX, Render, AWS)*   *live* | ***github***
Created a Pixel-Perfect clone of Spotify using a React front-end and Flask back-end

- Implemented **Amazon Web Services(AWS) S3** integration for seamless uploading and storage of user-generated playlist images.
- Utilized **Material-UI** to design and develop a responsive and mobile friendly web interface for the platform.
- Implemented **REST API** that enables advanced user review functionality for albums, including the ability for users to rate, comment, and share detailed feedback on playlists.
- Created and managed database models and implemented database migrations using **Flask** and **SQLAlchemy** to develop a more simplified schema.

Splitwise | *(JavaScript, React/Redux, Python, Flask, SQLAlcehmy, HTML, CSS, JSX, Render)*   *live* | ***github***
Built a pixel perfect clone of an application with the use of **HTML** and **CSS** and no external libraries.

- Incorporated a search feature that allowed users to filter through their friends list data from **SQLite3** database by name.
- Streamlined multiple tab features by manipulating **HTML** classes for a responsive layout and eye-catching designs.
- Employed **Redux** to manage state in **React** components resulting in DRY readable code that was implemented in various other facets of the project.
- Participated in daily team meetings and in pair programming, utilizing Git for effective version control, resulting in decreased debugging time and enhanced team collaboration.

Airbnb Clone | *(JavaScript, React/Redux, HTML, CSS, Express.js, Node.js, SQLite3, AWS, Heroku)*   *live* | ***github***
Developed a precise copy of Airbnb utilizing a React front-end and Express.js back-end, achieving pixel-perfect accuracy.

- Utilized **Bcrypt** to hash and verify user password to ensure the security of user data on the user registration and login components.
- Integrated **Google Maps API** to show property listings location on a map, providing a more efficient way for users to find properties based on location.
- Created a 5-star rating system and implemented a calculation for the average rating of properties, providing guests with a more accurate representation of the property's quality.

EXPERIENCE

Sourcing Manager/Recruiter - *Spectrum Accountable Care*   Nov 2016 - Dec 2022

- Strong knowledge of recruiting and sourcing methods, including online job boards, social media, and professional networks
- Skilled in finding passive candidates through creative outreach and screening, streamlining hiring
- Proven ability to understand the needs of the organization and match them with the qualifications and fit of the candidate
- Experience in managing recruiting processes and team members and in forecasting and budgeting staffing needs.

MMA Fighter/Coach - *Team Dexter Vale Tudo*   **March** 2007 - Dec 2022

- Ability to perform well under pressure in dynamic and high-stakes situations.
- Ability to teach fighters at all levels from beginners to professionals, and help them develop personalized gameplans at more experienced levels. .
- Strong ability to analyze and break down fight footage to identify strengths and weaknesses, and then develop strong fight strategy and game plan.

EDUCATION

App Academy

- Produced multiple Full-Stack web applications in both group and individual settings to gain daily exposure to modern developmental languages and frameworks including Javascript, Python, SQL, Docker, Git, and React.
